PROFESSIONAL PROFILE

I am a **FullStack** developer with experience in web technologies and mobile applications.

On a day-to-day basis, I develop from the **Frontend** part mainly with Html, CSS, Javascript and React.js, although I can combine it with other technologies to adapt to each project.
On the **Backend** side my toolkit consists of Node.js with Firebase or MongoDB.
To create **Apps** I use Flutter and Dart since they allow me to work on both Android and IOS with a single language and Framework

ABOUT ME

I am passionate about new technologies, computing and especially **Blockchain**. I love challenges and working on interesting ideas. I spend a lot of my time learning about technology and I am learning how to develop **Smart Contracts** with Solidity.
